Cyber security and the futility of finger pointing

Business Computing World August 16, 2011

Authors: Bill (F. William) Conner

Today, some of the most dangerous criminals we face operate in an entirely new battlefield – cyberspace – posing a greater threat to the security of nations, of corporations and of individuals, than ever before.

In fact, in today's cyberworld, the balance in the arms race between those who strive to do good and those who want to harm us is not even close.

Authentication after the RSA breach: Sticking to hard tokens could be a mistake

ComputerWorld UK September 20, 2011 Authors: Bill (F. William) Conner

In the wake of the RSA data breach, and the subsequent news of customers' compromised data, the ability of hard tokens to defend against the most sophisticated cyber criminals is subject to serious scrutiny.

Dallas company arms Interpol in cyber wars

Dallas Morning News November 5, 2011

Authors: Bill (F. William) Conner, Cheryl Hall

Bill Conner runs a defense company whose customers are threatened by new forms of global attack every day.

The 52-year-old president and chief executive of Dallas-based Entrust Inc. sells software and technology to such marquee customers as Citibank, Interpol and the governments of the U.S., Canada, Britain and the Middle East in their battle against cybercrime, identity theft and terrorism.

National Security Report

C-SPAN April 12, 2004

Authors: Bill (F. William) Conner

Government and private sector officials spoke to reporters about a study on cybersecurity and urged industry leaders to assume more responsibility in securing their computer networks. Following their remarks they answered questions from the reporters.

Richard Stiennon & Bill Conner Discuss State of the Cybersecurity Industry

IT Harvest February 2012

Authors: Bill (F. William) Conner, Richard Stiennon

Richard Stiennon, security analyst with IT Harvest, sits down with Entrust CEO Bill Conner at RSA Conference 2012 to discuss the state of the cybersecurity industry. Topics included the SSL/CA market, plus the changes cloud and mobility are bringing to the IT landscape.

The Private Sector Responds to Cyber Threats

C-SPAN February 8, 2012

Authors: Bill (F. William) Conner

The discussion, with various business leaders, revolved around the challenges concerning cyber security threats and the private sector. They focused heavily on cyber threats to small businesses, communications companies and smart/mobile technology. Other topics included federal legislation with cyber security, the FCC's role and cyber security models in other countries like Australia and Germany.

Cybersecurity Execs Talk Govt Threats

C-SPAN The Communicators March 3, 2012

Authors: Bill (F. William) Conner

On this week's "Communicators," two cybersecurity business executives - Robert Dix Juniper Networks and Bill Conner of Entrust - discuss cyber threats to government and business communications networks.

Topics on the agenda include: How serious the cyber threats are, the kind of regulation the government should encourage through legislation and government-business partnerships in fighting cyber threats.

SMBs more vulnerable to data breaches than larger brethren

InfoSecurity Magazine October 11, 2012

Authors: Bill (F. William) Conner, InfoSecurity Magazine

Contrary to conventional wisdom, hackers don't just target large enterprises with vast amounts of data to steal. Small- and medium-sized businesses are just as attractive of targets, and in some cases are more so.

Dallas-based Entrust helps Afghanistan find a new normal

The Dallas Morning News March 2, 2013

Authors: Bill (F. William) Conner, Cheryl Hall

Entrust CEO Bill Conner has teamed up with Turialia Wafa of Grand Technology Resources to develop a national identification program for Afghanistan.

Richard Stiennon and Bill Conner Sit Down at RSA Conference 2013

IT Harvest March 19, 2013

Authors: Bill (F. William) Conner, Richard Stiennon

Richard Stiennon, security analyst with IT Harvest, sits down with Entrust CEO Bill Conner at RSA Conference 2013 to discuss the state of the cybersecurity industry. Topics included the digital certificate market and the changing security environment being brought about by the proliferation of identities as they collide with the threat landscape.

Entrust puts down stake in the future of mobile security and digital certificates

NetworkWorld March 25, 2012

Authors: Bill (F. William) Conner, Ellen Messmer

Interview with Ellen Messmer of NetworkWorld on digital certificates, mobile security and the health of Entrust.

ANALYSIS: How and why denial -of-service attacks persist

USA Today March 29, 2013

Authors: Bill (F. William) Conner, Byron Acohido

Securing Digital Identities: Separating Fact From Fiction in Mobile Security

Texas CEO Magazine March 30, 2013

Authors: Bill (F. William) Conner

It's an intimidating new landscape – there's no question about that. But the reality is the consumerization of the enterprise is happening now. Employees have already started bringing their own devices to work. Today, CEOs from company's large and small need to be ready to move beyond BYOD or Bring Your Own Device. Companies must be able to secure all of the many mobile devices the average user now brings, and be equipped with facts on how mobile devices can provide a new line of defense in logical and physical environments.

Mobile More Secure Than Desktop for Protecting Systems Against Malware

ComputerWorld UK June 10, 2013

Authors: Bill (F. William) Conner, Derek du Preez

In an interview with Computerworld UK, Conner said that companies and governments need to recognise that malware is always going to get into the network and that they need to focus their efforts on securing the identities of individuals through mobile.

How to Protect Against Cyber-Espionage

Bloomberg TV July 16, 2013

Authors: Bill (F. William) Conner, Erik Schatzker

Bill's interview with Bloomberg, which aired on Market Makers, focused on the major challenges organizations face when defending against malicious crime groups, hackers and state-sponsors. Facilitated by Bloomberg anchor and editor-at-large Erik Schatzker, the segment explored the delicate balancing act of defending against both external and internal cybersecurity threats.

Protecting Petroleum

Fox Business Network July 16, 2013

Authors: Bill (F. William) Conner, Dennis Kneale

Interviewed by Dennis Kneale, Bill discussed the risks posed to critical infrastructure by both internal and external cyber threats.

ID security CEO: 'NYT' hackers did their homework

USA Today August 28, 2013

Authors: Bill (F. William) Conner, Byron Acohido

Byron Acohido writes on the latest attack from the Syrian Electronic Army on the New York Times and draws from industry experts' views on the attack.
